Inside small electronic devices may be very powerful coin-sized button batteries. When swallowed, these batteries can get stuck in the throat and cause severe burns or death.

**Take Charge. Act Now.** 

- 1** Keep devices with button batteries out of reach if the battery compartments aren't secure, and lock away loose batteries.
- 2** If a child swallows a button battery, go to the emergency room right away. Do not let the child eat or drink and do not induce vomiting.
- 3** Share this information with others.
